

Instantly lock-down your building from anywhere.

Security in the Palm of Your Hands

From an award-winning innovator in access control solutions, PDC IDenticard's PremiSys Mobile App gives system users the freedom to remotely manage daily security activities. The PremiSys Mobile App runs on a mobile phone or tablet and is an invaluable tool for running your facility's security system.

Access Control

- Lock, unlock, or lock out any individual door or group of doors
- Add, view, or edit cardholder information
- Instantly deactivate a cardholder record so that it no longer has access to the building(s)
- Run reports on system and cardholder events
- Acknowledge and clear system alarms
- Assign and modify what doors a cardholder may access
- Scan barcodes to search for cardholder records

Manage Your Mobile App Users!

PremiSys Mobile makes it easy to manage and track who is using the PremiSys mobile app.

- Record when mobile app users sign in/out
- Log user and device names associated with user activity
- Restrict areas of the mobile app that users may access
- Track changes made to cardholder records

The PremiSys Mobile App is compatible with Apple® iPhone®, iPad®, and Android™* Smartphone and is available through the Apple® App Store and the Google Play Store.

A mobile license must be activated through the PremiSys access control system.

*Available for iOS 7 and greater and Android 4 and greater.

PremiSys™ Mobile Access Control

Video Integration

Available with select video management systems

- View live video feeds 24/7
- View recorded video tied to alarm acknowledgements
- Visually confirm employee identity before remotely unlocking a door

Turns PremiSys™ into a Mobile Badging Enrollment Station

PDC IDenticard's revolutionary Mobile App integrates with PremiSys access control system to allow system administrators to manage the badging operations from remote locations. Take employee photos and print ID cards without employees leaving their workplace; saving time and productivity for your organization.

Use a Mobile Device to:

- Take and upload cardholder photos
- Add new cardholder records
- Print ID cards
- Assign and modify what doors cardholders may access
- Instantly deactivate a cardholder record so that it can't access the building(s)
- Define up to 50 cardholder fields on the cardholder screen of the mobile app
- Match license plates to cardholder records with License Plate Look-up

PremiSys™ Mobile Badging

Optimized for iPad®

The PremiSys Mobile App is compatible with Apple® iPhone®*, iPad®, and Android™* Smartphone and is available through the Apple® App Store and the Google Play Store.

A mobile license must be activated through the PremiSys access control system.

*Available for iOS 7 and greater and Android 4 and greater.
